

Grundfos

- Centrifugal pumps • Stainless steel, Titanium • Vertical multi-stage • Circulators
- Groundwater • E-pumps • Pressure boosting and constant pressure systems
- BoosterpaQ (constant pressure boosting) • ANSI/NSF61 Approved

Grundfos Dosing

- Advanced “next generation” digital dosing stepper motor technology
- Mechanical and hydraulic diaphragm designs
- Measurement and control • Chemical feed skids

Paco Pump

- Double Suction Split Case Pumps
- In-Line Centrifugals • End Suction Centrifugals

A Division of NOV

Moyno

- Progressing cavity pumps • Industrial and sanitary designs
- High solids pump systems and transfer equipment
- Mission - Centrifugal Pump for handling abrasive mud

Verder / VerderAir / Verder Lobe

- Peristaltic Hose Pumps (heavy duty, fully contained corrosion resistant hose)
- Peristaltic Tube Pumps –Smart Metering, fully programmable
- VerderAir – Air Operated Double Diaphragm Pump
- SSP Lobe Pumps – Stainless Steel, Ductile Iron

Pioneer Pump

- Self-priming, solids handling centrifugal pumps from 3-12 inches
- Vacuum assisted run dry, prime from dry, and re-prime pumps
- Diesel engine driven for skid or trailer mounted packages

World Chemical USA Pumps

- Magnetic drive, seal-less end-suction centrifugal pumps
- Magnetic self-priming pumps & Vertical Magnetic self-priming pumps

Haigh

- Pipeliner™: Wet Process Macerators
- Macerating Pumps and Sludge Conditioning

Assmann Tanks

- Rotational molded polyethylene tanks
- Cross-linked poly for chemical, linear poly for ANSI 61 potable water
- Sizes from 20 through 12,000 gallon, ISO 9001 Certification

Justin Tanks

- FRP Tanks - Certified Manufacturer
- Tanks ranging from 3 to 14 ft. diameter, using both contact molded and filament winding process

Protectolite

- Composite Parts for Water & Wastewater Industry
- Wier Plates, Baffles, Troughs, Pro-Deck Covers

PSI -MicroOclor (division of UGSI)

- The next generation of On-site sodium Hypochlorite Generators (20-3600 lbs./day)
- Tank shark – mixing/sampling/chemical injection of potable water tanks
- Monoclor - Chloramine Control for Water Distribution systems

PAX (division of UGSI)

- THM Removal Systems, RCS Residual Control Systems, Water Quality Management
- Mixers, Surface Aerators, Power Blowers, Surface Aerators, and ChemBlocker

Evoqua - UV Water Purification

- Closed vessel UV disinfection and advanced oxidation
- Medium pressure and Amalgam technologies
- Validated solutions for drinking water, wastewater, and reuse applications

ETI -- Environmental Technologies

- Ultraviolet (UV) based on NeoTech Aqua Solutions UV technologies
- ET Ozone Generators using Plasma Technics air or water cooled Plasma Blo3ck®
- Membrane Filtration Systems featuring Toray spiral and hollow fiber membranes

Aqualitec

- Scentec and Raketec bar screens
- Multi-rake screen • Drum Screen • Spiral Screen
- Wash Compactor • Grit Classifier

Olympus Technologies, Inc.

- Anaerobic Digestion Process Equipment
- Digester Covers: Fixed, Floating, Buoyant, & Gasholders
- Digester Mixers – Mechanical Draft Tube Mixers cover mounted and external
- Concentric Tube Heat Exchangers & Draft Tube Mixer Heat Exchanger

UNISON Solutions

- Bio-Gas Conditioning Systems are custom engineered and fabricated
- BioCNG vehicle fuel systems and distributed generation.

AWC Water Solutions

- Design and manufacture packaged water and wastewater treatment plants
- Membrane filtration, flocculation, clarification, dissolved air flotation
- Modular treatment Plants
- Sequencing Biological Reactor (SBR)

Kraft Energy Systems – Combined Heat and Power

- Prepackaged plug-and-play modular systems and customizable power components
- Power ranging from 50kW - 3 Mw.
- Landfill/Digester Gas, Natural Gas, Biodiesel, and Coal Bed Methane

Greenlane Biogas

- Upgrading Biogas to Biomethane (RNG) for use in Natural Gas Pipelines and for vehicle fuel.
